Principles

The Film and Sound Incentive Programs have been designed based on the following general principles. These principles will be used to guide operational decisions.

Economic Sustainability

The private sector is the preferred engine of economic growth for the Yukon economy.

Balanced Interests

Funding requirements will reflect a fair balance between financial accountability for the expenditure of public funds and the administrative burden borne by fund applicants.

Fairness and Impartiality

Government funding shall not alter level playing fields in the business community by fostering unfair competition.

All funding applications will be treated in a fair and impartial manner and the processing of applications will be conducted as expeditiously as considerations of due diligence allow.

Goals

The goals of the Film and Sound Incentives Programs are to:

- 1 Maintain and ultimately increase the level of total independent film and sound recording production and expenditure in Yukon;
 - 2 Maximize Yukon employment opportunities resulting from film and sound recording production in Yukon;
 - 3 Encourage sustainable growth in the Yukon film and sound recording production sector resulting in a stronger infrastructure of skills and services.
- 

Program Restrictions

Program restrictions are intended to:

- 1 Encourage productions that genuinely benefit the Yukon economy;
- 2 Encourage sustainable growth in the Yukon film and sound recording production and production services sector;
- 3 Extend the number of productions that may participate by limiting the access any one production has to program funds;
- 4 Ensure accountability by requiring a full reporting of Yukon expenditures from each participating production.

To ensure that the funds paid out by this program best serve the purposes of the program, Yukon Media Development may, by means of a written statement to the applicant and the Deputy Head, reduce or decline an application on the basis that:

- A. In the case where there is – for whatever reason - a substantial difference between the information provided in the approval process and what later occurred;
- B. The situation being applied for is – in spirit or in specifics – clearly different from what the program was intended to accomplish.
